A Message from the TA Leadership Team

We are about to start a showcase event at the Scotford site! On April 1st, 2023, we begin shutting down some of the Upgrader South Turnaround production units.

Pework has begun in RHCT. The Pework is mainly made up of Scaffold erection with Brand and Decontamination Header Assembly with Edmonton Exchanger. These activities are led by Kirby Vestby in the field. We have also recently reverted to wintery conditions; so, we must quickly retrain ourselves.

Our Goals

Our main goal for this event is to ensure that everyone supporting the event go home each day the same way they came in. To achieve a Goal Zero event; we must rely on communication, intervention, and most of all, respect for one another. Communication is important to understand our work and the hazards associated with that work. We intervene when we feel or see something that doesn't seem right. Both intervention and communication must be respectful to be effective and build trust to leverage the skills and experience of each person working within the event. We are one team working towards the same goal of a successful and safe event; so please make a conscious effort to have open and constructive conversations, stay positive, and remain focused on the tasks at hand. We can work through any problem that comes our way as one team!
