HOUSEKEEPING IS SAFE KEEPING

Good Housekeeping is One of the First Rules of Incident Prevention

Housekeeping starts at the beginning of the shift and requires continuous effort to make certain the entire job and work area is kept clean and hazard free. Entering a clean workspace at the start of the day has many psychological benefits, it promotes safety, and demonstrates pride in our work. Poor housekeeping on the other hand, often results in unsafe conditions, less care, and injuries.

We get it, each work front is unique and has its own challenges but with some good old fashion pitching in, some effort and good choices, we can eliminate most housekeeping related obstacles.

- Tools that haven't been returned to the tool cribs after use and materials that are left lying around contribute to increased congestion and bigger hazards. Disposing of scrap materials daily and removing tools no longer required contribute to a safer work area.

- Welding leads, hoses, and extension cords. If placed improperly they become tripping hazards. Please keep walkways free for passage and use walkovers to mitigate these hazards where possible.
- Where someone has taken the time to manage cords and hoses with cross over ramps, please use them. Avoid short cuts and stepping over hoses where it can be avoided. It generally takes only a few more steps whereas a momentary loss of focus or mis-step can result in injury.

Taking just five minutes at the beginning and end a shift to tidy up helps to reset workspaces to clean, orderly and safe spaces. Remember, good housekeeping is safe-keeping. **Take a look around your work area before you start today. Is the level of housekeeping acceptable? Is a tool round up required? What other small adjustments will make this area safer?**

TESTING FRONTLINE RELATIONSHIPS

Please Provide Us Your Feedback

The completion of the Pre TA–Test Frontline Relationships form is to provide feedback on improving our front line relationships. Front line meaning all (HSSE, Contractor Foreman, PEI, PE, Production, Field Leads, Etc.)

Please provide constructive feedback on topics such as technical material, duration to complete, training assessment, etc. Rating scale is between 1 and 5 – 1 being the least or worst, and 5 being the best or most. This form can be accessed from the QR code to the left.

Thank you, [Devin Weyland - TA Event Manager & Graham Polischuk - NRES](#)

STEP

See It, Own It

Another crew left a mess.

There are tools at risk of falling, garbage on the walkway, a truck has a low tire, flagging has no tags, and so on.

Even while you may not technically own an issue, if you see it and fix it, or communicate to the people who can fix it, you've made the work site safer for everyone!

It's easy to walk by an issue, but it's BEST to own the issue ... for everyone's sake!

PEDESTRIAN SAFETY

Walking is working after all, and pedestrian safety is everyone's responsibility.

Here are a few tips to help keep everyone safe:

- Traction aides – as per conditions dictate.
- Roadways – ensure no more than two people are walking side by side at any time.
- Hoods – not to obstruct your view while walking.
- Eye contact – required with drivers prior to proceeding across roadways and crossings.
- Designated walkways – use them and avoid goat trails.
- Boots – to be in good repair.
- Accountability – look out for each other.

Did you know Scotford has a Slip & Slide Hotline? Call 780-922-3555. We understand Alberta weather can be unpredictable at best and change can be frustrating. Please, when you call, remember the person on the other end is trying their best!

What's the difference between a regular joke and a dad joke?

When the punch line becomes a parent!

GOAL ZERO CUP

Brand Scaffolder worker Ty Chabillon was nominated for the Goal Zero cup because of his dedication to Safety Above All Else.

Ty was proactive and "safed out" a bolt that was unattended sitting on the structural steel. He relocated the bolt in a safe area, then notified supervision. Potentially high risk hazard for potential dropped object. #YouSeeltYouOwnIt

Hoisting the Goal Zero Cup - Brand Foreman Brandon Whitehall and his crack crew. A new scaffold deck without stop the drop mitigations was identified and Brandon's crew had the issue rectified within 24 hours. Talk about service!

ATTENTION!

Changing conditions often present new hazards or call for a new procedure to finish the task.
