HANDS FREE FUNDAMENTALS

Hand injuries are one of the most common workplace injuries even though they are almost always preventable.

Your hands are the most important tools you use at work. They are the tools that make each of us highly skilled and valuable employees. It only takes a few seconds to severely damage your hands and leave you permanently disabled.

Hands Free Fundamentals:

1. **Identify and mitigate lines of fire/crush points** – identify and control potential line of fire and crush point hazards related to your hands or your co-worker’s hand(s) placement
2. **No hands on loads** – hands are not to touch any suspended load. **Loads can be guided by tag lines and/or push pull sticks.**

3. **Use handles or hands-free tools** – utilize handles that are designed/fit for purpose.
4. **No hands on energy sources** – keep your hands away from hazardous energy sources until the hazard is controlled or mitigations have been implemented.
5. **Use approved task-specific gloves** – are you using the correct glove for the task. Refer to the approved Shell glove matrix in SWP-6606.

We can prevent hand injuries by making sure we remove or minimize hazards before starting jobs. We just need to take a few extra moments to consider what could happen.

What is one change you can make today in how you approach your work that could prevent a hand injury?

STEP

RESPECT – For Others and For Property

Scotford aims to provide the buildings, equipment, and services everyone requires. We are here for many hours at a time, and these services need to be respected so that all can take advantage of them.

Defacing, soiling, damaging, or stealing property can affect everyone on site by making the service or building unavailable and decreasing workers' sense of safety at site.

This also applies to how we interact with those around us. We are working with people who are all trying to do their best. We are all different, but we have the same goal to go home safe and sound.

Respect for others goes a long way and is absolutely expected at Scotford.

IMPACT INJURY

Congratulations to Michelle Brophy from our Compass family here at Scotford!

Michelle is the lucky winner from the first draw for the MS Society 50/50 from April 26th.

Through this draw we raised \$9450 for the MS Society. This win was especially important to Michelle as her sister lives with MS!

There will be 3 more draws ... Best of Luck and thanks to all that have shown support!

GOAL ZERO CUP

Go ahead, guess one of the reasons the Night shift Compass Cleaning Crew in Westpark South were nominated for the Goal Zero Cup!

You guessed it ... they have a FANTASTIC, POSITIVE attitude and are friendly with everyone throughout the night. They are also doing "a superb job" keeping everything clean in the trailers! (left)

Thanks for making the trailers a great environment for your folks!

A big Thank you to the TA Contracts and Procurement Team – Stephen Huska, Brett Alexander, Darryl Grant, Corrie Giddens and others in their group work diligently to make sure material is coming in smoothly.

The amount of work that goes into the logistics of incoming material is a lot more than most think, and this crew does wonders to make sure the event starts on time with no material delays, that hotshots make it to site in time for usage with no delays in field, etc. (right)

Thanks for keeping us going! #hidethatshirtmister
