## HOUSEKEEPING IS SAFE KEEPING

*Good Housekeeping is One of the First Rules of Incident Prevention*

**PLEASE  
KEEP THIS  
PLACE CLEAN  
AND ORDERLY**

SmartSign.com • 800-952-1457 • S-2354

Housekeeping starts at the beginning of the shift and requires continuous effort to make certain the entire job and work area is kept clean and hazard free. Entering a clean workspace at the start of the

day has many psychological benefits, it promotes safety, and demonstrates pride in our work. Poor housekeeping on the other hand, often results in unsafe conditions, less care, and injuries.

We get it, each work front is unique and has its own challenges but with some good old fashion pitching in, some effort and good choices, we can eliminate most housekeeping related obstacles.

- Tools that haven't been returned to the tool cribs after use and materials that are left lying around contribute to increased congestion and bigger hazards. Disposing of scrap materials daily and removing tools no longer required contribute to a safer work area.

- Welding leads, hoses, and extension cords. If placed improperly they become tripping hazards. Please keep walkways free for passage and use walkovers to mitigate these hazards where possible.
- Where someone has taken the time to manage cords and hoses with cross over ramps, please use them. Avoid short cuts and stepping over hoses where it can be avoided. It generally takes only a few more steps whereas a momentary loss of focus or mis-step can result in injury.

Taking just five minutes at the beginning and end a shift to tidy up helps to reset workspaces to clean, orderly and safe spaces. Remember, good housekeeping is safe-keeping.

Take a look around your work area before you start today. Is the level of housekeeping acceptable? Is a tool round up required? What other small adjustments will make this area safer?

Thu Oct 5

Day 6° Feels 2 ⇌ 37 km/h NW ☁ 10 %  
⇌ 56 km/h  
☀ 10 hr

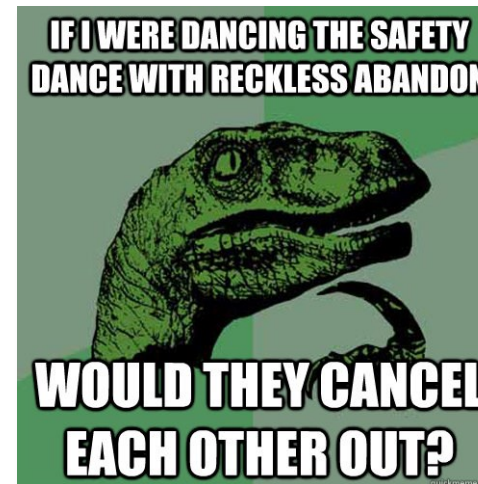

A few clouds in the morning, then sunny. Windy.

---

Night -2° Feels -6 ⇌ 22 km/h NW ☁ 20 %  
⇌ 33 km/h

Partly cloudy in the evening, then increasing clouds overnight.

TURNAROUND STATS	LAST 24 HRS	OVR ALL

## STEP *Clean and Clear as You Work*

The housekeeping overall is good, but we are not going all of the way.

For example, wrap up the containment, but instead of getting it out of the unit, we ball it up under a structure. Instead of removing wood in unit, we make squirrel piles.

Those squirrel piles could trip us up if we aren't careful!

## WALK THE TALK *Leading by Example*

No matter what your role is in this turn-around, you are, in one way or another, a leader.

Maybe you are the person who listens to the concerns of the crew, or the teammate who always makes sure everyone has the right PPE. You might be the person who always presses the crosswalk button before crossing the road, or maybe the person explaining the next job.

Never underestimate the impact your actions can have on those around you.

## GOAL ZERO UPDATE

### *This Chemco Nightshift Crew are Electrifying!*

"The Chemco folks jumped into action once the 600V MCC was isolated in Substation 3A. Isolations were walked down, starting with the 5kV starters, LOTO procedures reviewed and followed. JHA discussed around moving cabinets. Team worked flawlessly to get the new arc flash mitigation sections in position and safely bolted in place. Great communication, working with heavy equipment and cables. Everyone understood the assignment. **"Safely, On Time & Together."**

### *Inter-Company, Inter-Trade Collaboration and Team Work for the Win!*

"I'd like to nominate the Ed Ex rigging crew for PSA dismantle- Ed Ex riggers supported Brand on the scaffold dismantle with 2 riggers up top

providing excellent communication between Brand and the Mammoet crane operator working on scaffold Brand were dismantling. Also the riggers on the ground helping spot and guide the zoom boom in and out. **The Ed Ex team, like they normally do, just killed it! We, Brand, could have not done the job or been as successful without the excellent collaboration with Ed Ex. The riggers would be from FM-Marco LeBoutillier's crew."**
